Training « Intercultural communication & dealing with languages »

30.11.17 | 10:30 – 13:00
EWA Frauenzentrum E.V.
Prenzlauer Allee 6, 10405 Berlin

Some of the topics that we could deal with for example during the training are:

- What does direct and indirect communication mean? How helpful is it to know the difference for our work for instance to deal better with contradictions?
- How can we reduce (speech) inhibitions when we use a foreign language? (for yourself and others)
- Language learning: what is the impact of beeing "forced" to learn languages?
- Why are there people who do not want to learn German?
- What is the connection between language, body and emotions?
- How to work with multiple languages at the same time?
- Common (foreign)language but different definitions can sometimes have funny or dramatic results: how do I become more sensitive?
- When I offer a project or activity: how do I design the translations (e.g., public relations)?
- The stereotypes about languages: how does it influence me indirectly in my relations with people who speak other languages?
- "Hardly English, no Arabic, no Farsi, a bit of Spanish ... and no interpreters!" How can I communicate? What resources do I have?
- Misunderstandings take me further! How? How can I laugh more and work seriously?
